

### VoR's GROWING PRODUCT RANGE

By supplying the best pool cleaners and providing the best service VoR have become an established company in the commercial pool industry. VoR now have expanded their pool cleaner range and after careful research are introducing the International Caratti Pool Cleaners. The IC cleaners are suited to the smaller aquatic venues such as 25mtr pools, swim schools and resorts and clubs. Some Key features are...

- Easy handling
- Remote Control
- Many Cleaning Options
- Programmable automatic cleaning patterns and timer
- Contained Filter Bags
- Cleans walls
- Beach Control
- Can clean pools no matter what the shape

For more information or free demonstration please contact our office.

### 9 NEW CERTIFIED WEDA TECHNICIANS

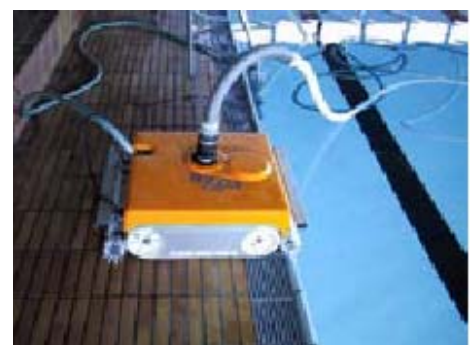

VoR recently sent their service staff for product training at WEDA Technical Support group in Sodertalje, Sweden. The training consisted of up coming products, any possible trouble shooting and complete overhauling of all WEDA equipment. This course was completed to ensure that VoR can provide its clients with the best after sales service and technical advice possible.

### WEDA DISCHARGE HOSE

Weda Pool Cleaners have many characteristics that give them that extra edge over your average cleaners. One example that differentiates us from the rest is the option to connect a discharge hose to your Weda pool cleaner and pump the water directly into the swimming pools own filter system allowing particles as small as 20 microns to be removed giving much cleaner water. This in turn means the use of chlorine can be decreased.

Another application for the hose outlet is for cleaning outdoor pools, especially the first time before opening for the summer season. Thanks to the powerful suction capacity of the Weda pool cleaners even thick layers of dirt and leaves can be removed. Whilst sand, leaves and dirt would clog a normal filter bag almost instantly, using the hose outlet, dirt and leaves can be pumped directly into the sewage system.
